

The FCC Chair is wrong when he stated to PBS, that people vote with their remotes. And he is wrong in thinking we vote yes to his very "Republican Idea" that large corporations need to own every bit of our media. This sounds so much like another Enron, that I can't believe the FCC would even entertain such a concept! All that does is give us the same bland flavor found in a T.V. Very dull, boring, opinionated news that is reported in the loud and coarse manner of a sports announcer. I don't want a very narrow view of the world and without all the diverse events that go on besides what the political machinery wants us to know. It also undermines the right to have choice in America. If the FCC allows such an evil thing to occur, the "we the people" will become "we the oppressed" and the noose around our neck by a corporate run government will tighten and we will be forever controlled. Much like those in Europe by those very leaders we had abhorred such as Hitler. I will fight this to my dying breath and I will support whatever it takes to fight this.
